Which Cigarette? Traditional or Electronic?

Let's start with clearing up some myths. Electronic cigarettes are not free from nicotine in general. They are free from raw tobacco. However, it is liquid nicotine that drives these cigarettes.

And at the same time, there are different strengths of electronic cigarettes available, as well as flavors. There is indeed a version of 0% strength available that you can smoke. This is purely a flavored smoke and is free from liquid nicotine. So if you are looking for electronic cigarettes in order to stop smoking, then a great way could be slowly or drastically (depending upon your choice) switching over to these 0% strength electronic cigarettes. No, you don't have to buy a new cigarette kit for that. If you choose the right type of cigarette from any brand then you shall be simply able to replace your smoking fluid (liquid nicotine) with another cartridge of liquid nicotine. This report will help you understand what the right type of electronic cigarette is and what's not.

Please be at your attentive best while reading this report. A thorough read has the potential to change your life if you want to change, and can make you a happier person if you follow the details carefully. After having said the above, now is a good time to get started with the real material.

Electronic cigarettes have replaced traditional cigarettes across a significant section of smokers. What's wrong with traditional cigarettes? Nothing is really wrong outside the traditional potential health injuries that a traditional cigarette can possibly cause. And contrary to the popular belief, electronic cigarettes also are not yet proven to be free from such potential health hazards.

However, there are some other benefits of electronic cigarettes that are not observed in traditional ones. For example, a traditional cigarette involves fire and ash. The electronic cigarettes are completely free both from fire and from ash. An electronic cigarette would further let you off from offensive smoke and the typical smoker's breathe factor. While it is not yet really proved that electronic cigarettes are better for health, but the

How Does an Electronic Cigarette Work?

powering battery will help making the smoke from liquid nicotine and have the smoker enjoy the feeling. This feels like real smoking also because the cigarettes are designed to look like real ones which in turn impact the mind-set of the smoker.

The photo below is a person smoking an electronic cigarette of the brand that we recommend (CWGLive). Yeah, he was trying to make a lot of smoke to test it – and look at what he could easily make.

To better simulate the experience of smoking and make the feeling close to a conventional cigarette smoking, these devices also come fitted with a front end LED glow lamp with red color. The LEDs brighten up as one smokes. And interestingly, an electronic cigarette is made up of more than one part that can be refilled, reused or substituted.

The Two Main Components of Electronic Cigarettes

The good electronic cigarettes are available in two-component modules. One of them is the

Dreams – lot of flavors (and "no flavor" also) to choose from.

Equivalence of Cartridges and Traditional Cigarettes

A nicotine cartridge of an electronic cigarette lasts as much as 20-25 traditional cigarettes. Some companies improved the quality push it to around an equivalent of a cartridge to 25-30 traditional cigarettes.

30 traditional cigarettes are equivalent to one-and-half packets of traditional cigarettes if you are from a country like USA where a pack of cigarettes contains twenty. If a pack of traditional cigarette contains ten pieces like in India, then this is equivalent to a pack of thirty cigarettes. Please correlate this number with your country and think accordingly.

In this write-up, we have calculated one traditional cigarette as an equivalent to

Benefits of Smoking Electronic Cigarettes

There are a number of benefits that one can reap by using electronic cigarettes in place of traditional ones.
